Boron Nitride PCBN2000

General Properties

Hot pressed for strength, PCBN2000 is an advanced composite, a boron nitride/silica compound delivering excellent dielectric performance and insulation. This material has excellent thermal shock resistance while delivering low thermal expansion.

PCBN2000 is easily machined and has good flexural strength for a boron nitride.

Applications

- Aerospace for electric propulsion discharge channels/Hall effect thrusters
- Plasma/corona insulators
- Plasma constraints in PVD systems
- Wear and corrosion resistance
- Ultra high vacuum insulators
